WHY you need this extension?

Store Maintenance Lite for Magento 2 is one of the most important extensions that you can use for your website. This extension is useful to display a temporary website maintenance page on the frontend.

Whenever you change the design of your website and want to improve or add functionality to your website, you can use the Store Maintenance Lite to display the temporary website under the maintenance page. This can be modified by the admin to display a logo or other text on the maintenance page when configured maintenance time page is displayed. Customized content can also be viewed using the preview button before applying changes.

The admin can also keep a log of users who visited the site during the maintenance period. These logs can be used later to analyze data about how many users visited the website during the maintenance period.

The admin can also put users on the whitelist using their IP address or pages using URLs. Whitelisted users can access the site without seeing the store's maintenance page. Any users can also view all whitelisted pages and other parts of the website will remain under the maintenance.

HOW it works?

Enable Store Maintenance

Sign in to Magento Admin panel and navigate to **Store** → **Configuration** → **Magediary** → **Store Maintenance Lite** → **General**, Here select **Yes** to enable store maintenance and save the configuration.

Please keep the Full page caching disabled while the Store Maintenance is enabled.

Maintenance page content

Content section allows managing the content using WYSIWYG editor and css of the maintenance page which will be displayed on the frontend.

The screenshot displays the 'Content' configuration interface. At the top left, the title 'Content' is visible. Below it, the 'Maintenance Page Content' section is active, with a '[store view]' label and a 'Show / Hide Editor' button. The WYSIWYG editor shows a paragraph with the heading 'We're under maintenance' and two lines of text: 'Our store is undergoing a bit of scheduled maintenance.' and 'We apologize for the inconvenience. We'll be back up and running as fast as possible.' The editor toolbar includes options for Paragraph, Bold (B), Italic (I), Underline (U), Bulleted List, Numbered List, Link, Table, Omega symbol, Image, and a close button (x). A 'Powered by TinyMCE' watermark is present in the bottom right of the editor. Below the editor is the 'Custom CSS' section, also with a '[store view]' label, containing the following CSS code:

```
body {
  background-color: #222;
}
.maintenance {
  text-align: center;
  margin-top: 120px;
  padding: 25px;
  background-color: #555;
  color: #fff;
}
.maintenance h2 {
  font-size: 32px;
  font-weight: bold;
  margin-top: 2rem;
  margin-bottom: 2.5rem;
}
```

A 'Preview' button is located at the bottom of the configuration area.

Maintenance Page Content

Maintenance Page Content is a WYSIWYG editor field that allows editing the content of the maintenance page according to your requirement.

Maintenance Page Content [store view] Show / Hide Editor

Heading 2 **B** *I* U [List Icons] [Link] [Table] [Omega] [Image] [Media] (x)

We're under maintenance

Our store is undergoing a bit of scheduled maintenance.

We apologize for the inconvenience. We'll be back up and running as fast as possible.

Powered by TinyMCE

div » h2

Custom CSS

Custom CSS allows editing the CSS of a maintenance page. CSS mentioned in this field will be added in the maintenance page.

Custom CSS [store view]

```
body {
  background-color: #222;
}
.maintenance {
  text-align: center;
  margin-top: 120px;
  padding: 25px;
  background-color: #555;
  color: #fff;
}
.maintenance h2 {
  font-size: 32px;
  font-weight: bold;
  margin-top: 2rem;
  margin-bottom: 2.5rem;
}
```

Restrictions

Restrictions configuration whitelist IPs and URLs that bypass the maintenance page.

Restrictions

Allowed IPs
[store view]

```
41.161.63.30
216.3.128.12
59.91.127.29
95.47.116.184
```

Each IP on a separate line. Leave blank to restrict for all IPs.

My Current IP
[store view]

```
95.47.116.184
```

Excepted URLs
[store view]

```
contact
about-us
blog
```

Please specify relative URLs (like /contact/). Each URL on a separate line.

Note: URLs are excluded by partial occurrence. If you specify "blog", all URL's containing "blog" will be excluded.

Logging
[store view]

```
Log only denied access
```

The log will be stored at var/log/store_maintenance.log

Allowed IPs

Allowed IPs field used to whitelist IPs. The website will be accessed for IP addresses added in this field. Leave blank to restrict for all IPs.

My Current IP field makes it easy to get your current IP to whitelist by adding that in the Allowed IPs field.

Allowed IPs
[store view]

41.161.63.30
216.3.128.12
59.91.127.29
95.47.116.184

Each IP on a separate line. Leave blank to restrict for all IPs.

My Current IP
[store view]

95.47.116.184

Add each IP address on a separate line.

Allowed URLs

Allowed URLs field is used to whitelist specific matching URLs. The website will be accessed for matching URL added in this field.

Excepted URLs
[store view]

contact
about-us
blog

Please specify relative URLs (like /contact/). Each URL on a separate line.

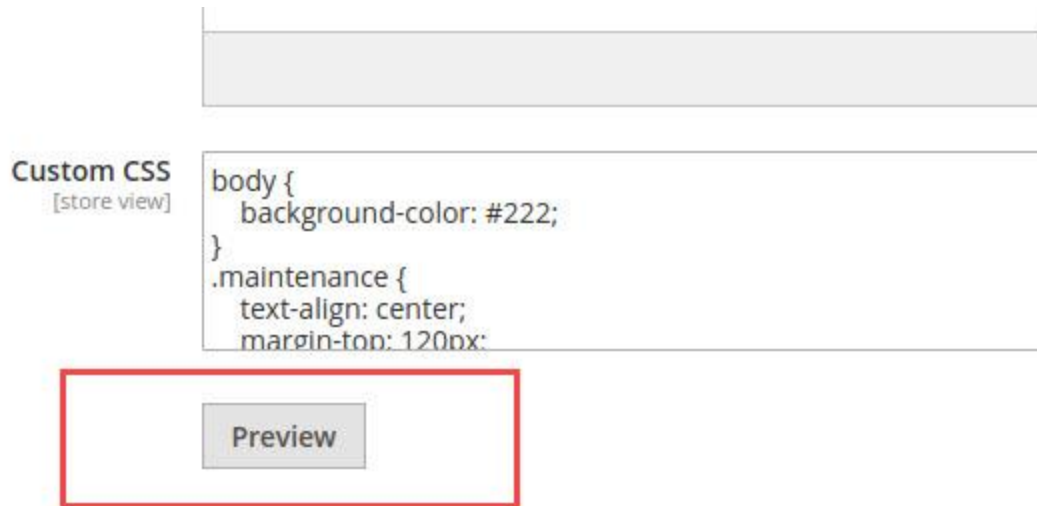

Note: URLs are excluded by partial occurrence. If you specify "blog", all URL's containing "blog" will be excluded

Here, the website will be available for URLs like

- yourwebsite.com/contact
- yourwebsite.com/blog
- yourwebsite.com/blog/hello-world
- yourwebsite.com/blog-hello-world

Preview Maintenance page

Preview button allows you to check how the maintenance page looks like. So you can check the maintenance page before enabling it.

WHAT are the benefits?

- Simple option to enable or disable the maintenance mode from the backend.
- Best way to provide additional product related information via Tabs to the customers.
- Easy to edit maintenance page content using WYSIWYG editor.
- The admin can easily whitelist IPs of selected users who can access the website during maintenance mode.
- The admin can easily whitelist page URLs which can be accessed by all visitors during maintenance mode.
- A log of visitors who visited the website during the maintenance can be stored using the backend by the admin which can be used to analyze the number of visitors during maintenance.
- Straightforward configuration from the backend for maintenance mode.
